

Ultrasound Special Skills Module Guardian Role Description

Title	<p>FSRH Ultrasound SSM Module Guardian</p> <p>This is a voluntary role</p>
Accountable to	<p>Specialist Qualifications Committee (which is committee of the Specialist Training Committee)</p>
About FSRH	<p>Our specialist committees of SRH professionals work together to produce high quality training programmes, specialist conferences and events, clinical guidance and other SRH learning resources, all of which are designed to support members' continued learning and development in SRH.</p> <p>Want to know more about FSRH? Visit www.fsrh.org</p>
The programme	<p>Direct access to ultrasound imaging within community-based contraception and reproductive health care services can improve the level of service offered to users. Doctors and nurses who work in these services come from a variety of backgrounds so a standardised training programme in ultrasound imaging with a clearly defined curriculum and competencies is essential.</p> <p>The programme is curriculum-based with both theoretical and practical components aimed at doctors, nurses and midwives who have already acquired an acceptable qualification and are working in contraception and reproductive health care in the community.</p> <p>The Ultrasound programme is not meant to encompass the full range of gynaecological problems that may occur. Rather, it concentrates on clinical conditions or situations that arise routinely in community-based services. An important part of the training is to ensure that clinicians are aware of their limitations and work within clinical competencies.</p> <p>Certification of completion of training indicates to prospective employers that the necessary competencies have been acquired.</p> <p>Further information about the programme can be found on the FSRH website:</p>
